## *Fantasia*

Once upon a time a gnome and his friend Pan were out walking when they discovered a beautiful dell. Here, they decided, was the perfect place for an animal festival, so they called all their friends—fairies and animals—to come celebrate with them. They had made a fairy ring around the dell to keep intruders out, but all at once six jealous witches who wanted it for themselves came swooping down upon them. The terrified animals ran off, looking for help, when suddenly there appeared on the fringe of the dell a bevy of beautiful visions, followed by the Queen of Fantasy. Using her powerful magic, the queen made the witches melt to the ground and the animals joyfully danced for her until sunset when Pan and the gnome dispelled the fairy ring, and all the figures disappeared from the dell.
